Road Refresher™

Non spill pet travel bowl

The Road Refresher™ pet travel bowl

An ingenious non-spill pet water bowl that eliminates spills and reduces your pet's slobber by up to 90%.

Ideal for the home and all forms of travel

For The Home - Road Refresher stops spills from accidental kicks and reduces slobber by up to 90% as it limits the amount of water your dog can pick up at any one time. The clever design will keep long ears and beards out of the water.

On The Move - Road Refresher can be filled with water and then safely left within a vehicle, boat or plane giving your pet access to fresh water whenever he wants, yet none will spill.

How It Works - Road Refresher has the floating aquaflow system inside which feeds enough water through for your dog to drink, yet immediately restricts the flow of water when the bowl is kicked or knocked. Velcro base fixes to carpeted areas, additional safe suction pads provided for fixing to most other surfaces.

Made from heat resistant, toughened polypropylene, the Road Refresher comes apart easily for cleaning then clicks safely back together again. No need to retrain your pet, they will think they are drinking from their favourite bowl.

Holds 1.4litres (54fl.oz) - Suitable for dogs of all sizes and breeds

Diameter of base 242mm x height 102mm.
